EDUCATION

Indiana University

Informatics B.S. with Human Centered Computing Cognate
Certificate in Accounting

Bloomington, Indiana
August 2023 – December 2026
Cumulative GPA: 3.8/4.0

TECHNICAL SKILLS

Software: Microsoft 365, Figma, NVivo, Lucid, Power BI, Tableau, Power Apps, Nexthink, Apptio

Web Development: HTML, CSS, JavaScript, Bootstrap, Jekyll, Git, GitHub

PROFESSIONAL EXPERIENCE

Humana

Advanced Tech Intern

May 2026 – August 2026 | Chicago, IL

- Led a research initiative to uncover barriers to knowledge discovery and reuse, synthesizing stakeholder insights into actionable requirements and experience improvements
- Built and tested a Power Apps prototype that streamlined content discovery through centralized search, standardized metadata, and user contribution workflows
- Presented recommendations and delivered a pilot strategy focused on increasing content discoverability, user confidence, and knowledge reuse across teams

Entry Tech Intern

May 2025 – August 2025 | Remote

- Designed and developed a dashboard prototype to visualize the cost to value ratio of an associate's digital experience enabling leadership to improve cost transparency and make data-driven investments
- Leveraged Nexthink and Apptio to build and iterate upon multiple Power BI drafts incorporating stakeholder input to align insights with project objectives
- Presented ongoing revisions to leadership, empowering stakeholder-driven decision-making, and concluded with an enterprise-wide showcase demonstrating the project's business value with a relevant use case

Luddy Consulting Association

Project Manager

August 2025 – May 2026 | Bloomington, IN

- Managed and mentored a team of 7 underclassmen through an Accenture-sponsored consulting engagement, teaching core tech-consulting methodologies, providing iterative feedback on research briefs and slide decks, and ensuring alignment with client expectations

Consultant

October 2024 – May 2025 | Bloomington, IN

- Collaborated with a team of four to design and pitch a mock ERP vendor assessment solution in partnership with Deloitte showcasing strategic evaluation to align with client expectations

Luddy School of Computing

Undergraduate Research Assistant

September 2023 – December 2023 | Bloomington, IN

- Co-authored a published research paper, conducting a structured literature review and utilizing NVivo software to categorize interview data from EHR researchers
- Applied coding techniques to organize interview dialogue into 10 distinct categories, enabling streamlined analysis of data quality assessment methods
- Examined published papers to compare manual and automated data quality assessment methods for EHRs, analyzing professional opinions and research findings

PROJECTS

Personal Portfolio Website

September 2026

- Created a responsive portfolio with Jekyll, HTML/CSS, and JavaScript, featuring projects, animations, and custom layouts across desktop and mobile
- Deployed the site with GitHub Pages and GitHub Actions, using Git version control and an automated deployment workflow to publish updates to the live website

NYC Parks Community Impact Dashboard (Tableau)

Spring 2026

- Built an interactive Tableau data story analyzing NYC Parks' community impact, integrating demographic data, open-space classifications, and capital project records into a cohesive narrative
- Leveraged Tableau parameters, calculated fields, and custom data modeling (pivoting, long-format restructuring, and metric segmentation) to build dynamic, filter-driven views
